TalentTrace AI

From Job Requirement to Evidence-Backed Hiring Decision

01 BEFORE INTERVIEW — Find the Right Candidates

Create Job Requirement ↓ **AI-Assisted Job Description Generation**

→ **Human Review & Approval**
Approval before publishing

→ **Publish Job** ↓ **Collect Applications & CVs**

→ **CV Screening** ↓ **Semantic Requirement Matching**

→ **Candidate Scoring & Ranking** ↓ **Select Candidate · Human**

→ **Schedule Interview & Send Secure Link**
Invite the selected candidate

Approved job requirements guide screening and evaluation.

Screening: Met / Partially Met / Unmet + CV Evidence

02 DURING INTERVIEW — Capture and Improve the Conversation

Secure interview access

Interviewer
Chooses and asks questions

Video Interview
Google Meet

Candidate
Joins and answers questions

Private suggestions

Live conversation

INTERVIEWER ONLY
Private AI Co-Pilot Suggestions
Follow-up questions only

Requirement Coverage Tracking
Find gaps in the conversation

Live Speaker-Attributed Transcript
Who said what, with timestamps

AI assists the interviewer. The interviewer leads the discussion.

Interview ends → structured transcript for assessment

03 AFTER INTERVIEW — Evaluate with Evidence

Saved CV evidence joins the interview assessment

Structured Transcript
Retrievable interview evidence

→ **Question & Answer Analysis** ↓ **Map Answers to Job Requirements**

→ **Technical Answer Verification**
Conditional • when needed
↓ **Requirement-Level Assessment**

→ **Combine CV + Interview Evidence** ↓ **Consolidated Candidate Assessment**

→ **Compare Candidates**
Same role, shared criteria

→ **HUMAN HIRING DECISION**
TalentTrace supports the decision

Evidence gaps remain visible; an unverified answer is not an automatic rejection.
